

REMARKS

Claims 1-20 are pending in the application. Support for the amendments to the specification may be found throughout the instant application and in FIGS. 15 and 16 as originally filed. In particular, FIG. 15 as originally filed shows a first line which connects to box (step) 1010 from a second connector, identified by the letter "B", proximally disposed above box (step) 1040. The second connector provides a pathway leading to box (step) 1010 from a box (step) 1140 shown in FIG. 16. Above box (step) 1045 is a decision point which allows for the method to proceed either through box (step) 1045 or follow a secondary pathway which leads through a first connector, identified by the letter "A", to a box (step) 1145 shown in FIG. 16. In reference to FIG. 16, from box (step) 1140 it is seen that two pathways may be selected to follow. The first pathway leads to box (step) 1145 and the second pathway follows the method which proceeds to box (step) 1010, through the second connector, as shown in FIG. 15. The first connector of FIG. 15 is reproduced in FIG. 16 as the connector which provides a secondary pathway to box (step) 1145. As previously described, the secondary pathway in FIG. 15 leads to the first connector, which in turn leads to box (step) 1145 in FIG. 16. Thus, support for the amendments to the specification is provided in the instant application as originally filed.

Appl. No.: 10/603,887

In Response To: Notice to File Corrected Application Papers dated June 25, 2004

Title: TRANSACTION AUTHENTICATION CARD

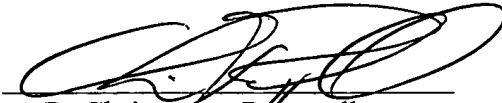

CONCLUSION

In light of the forgoing, entry of the amendment and allowance of the claims is earnestly solicited.

Respectfully submitted,
Campisi, et al.,

Dated: September 13, 2004
